

## *Phormidium inundatum*

**Sample name:** *Phormidium inundatum*

**Accession number for 16S rRNA partial gene sequence:** Not available

**Classification:** Bacteria; Cyanobacteria; Cyanophyceae; Oscillatoriales;  
Phormidiaceae; Phormidium

**Metabolism:** Autotrophic (oxygenic photosynthesis)

**Origin:** Thermal water, France

**Collection:** UTEX (TX, USA)

**Sample concentration:**  $1.42 \times 10^6$  cells/ml

**Sample count on filter substrate:**  $1.42 \pm 0.14 \times 10^7$  cells

**Laboratory growth conditions:** 25 °C, up to 6 months

**Culture medium:** Modified Bold 3N medium

**Sample photograph:**

**Sample micrograph:**
